Al via la 2a edizione del concorso video Chemistry Rediscovered, organizzato da EYCN, per l'Anno Internazionale della Tavola Periodica

*The 2nd edition of the video contest **Chemistry Rediscovered**, which is organized by EYCN and will be held in honor of the International Year of the Periodic Table in 2019, is going to start!*
We would like to warmly invite you to share this competition with your respective member society networks.

*The theme of this year is **In your element**. For this competition, young chemists (12-35 years old) are challenged to make a creative 90 seconds video related to one or more elements of the periodic table. The competition will be launched October 1st and videos can be submitted until the 31st of January 2019.*

All participants of the competition will receive a copy of the EuChemS Periodic Table, specially designed on the occasion of the International Year of the Periodic Table in 2019. In addition to that, they have a chance to win other Periodic Table related goodies and the overall winner(s) will be invited to Paris in July 2019, for the 47th IUPAC congress.

All the detailed information can be found in the Rules and Regulations document attached. Furthermore we attached a poster and an info sheet that contains all the information in brief.

For any further questions, don't hesitate to contact the project leader, Yacintha Vermeer (yacintha@yacintha.nl [1]).

Looking forward to receiving your countries' submissions!

Best wishes,
The EYCN Science team
