

1st French - Italian COORDINATION CHEMISTRY days

[Logo Def Blu orizzontale.jpg](#) [1]

For the first time, this conference is organized under the joint auspices of the sister French and Italian chemical societies: the Société Chimique de France (SCF) and the Società Chimica Italiana (SCI), along with the Division de Chimie de Coordination (DCC-SCF), the Divisione di Chimica Inorganica (DCI-SCI) and the Gruppo Interdivisionale di Chimica Organometallica (GICO-SCI).

This scientific event aims to bring together the communities of coordination chemists from both countries. The program of the conference will include 12 keynote lectures, including those of the winners of the DCC-SCF prizes (senior and junior), about 35 oral communications and a poster session.

These three days will be a privileged occasion for fruitful scientific exchanges, discussions and networking between scientists working in the field of coordination chemistry and its inter- and cross-disciplinary interfaces with other chemical disciplines as well as materials science, biology, physics and beyond.

We are looking forward to welcoming you in Strasbourg!

Informazioni **Organize by:** Société Chimique de France (SCF) and Società Chimica Italiana (SCI)

Luogo: Strasbourg

Dal: 24 January, 2024

Al: 26 January, 2024
